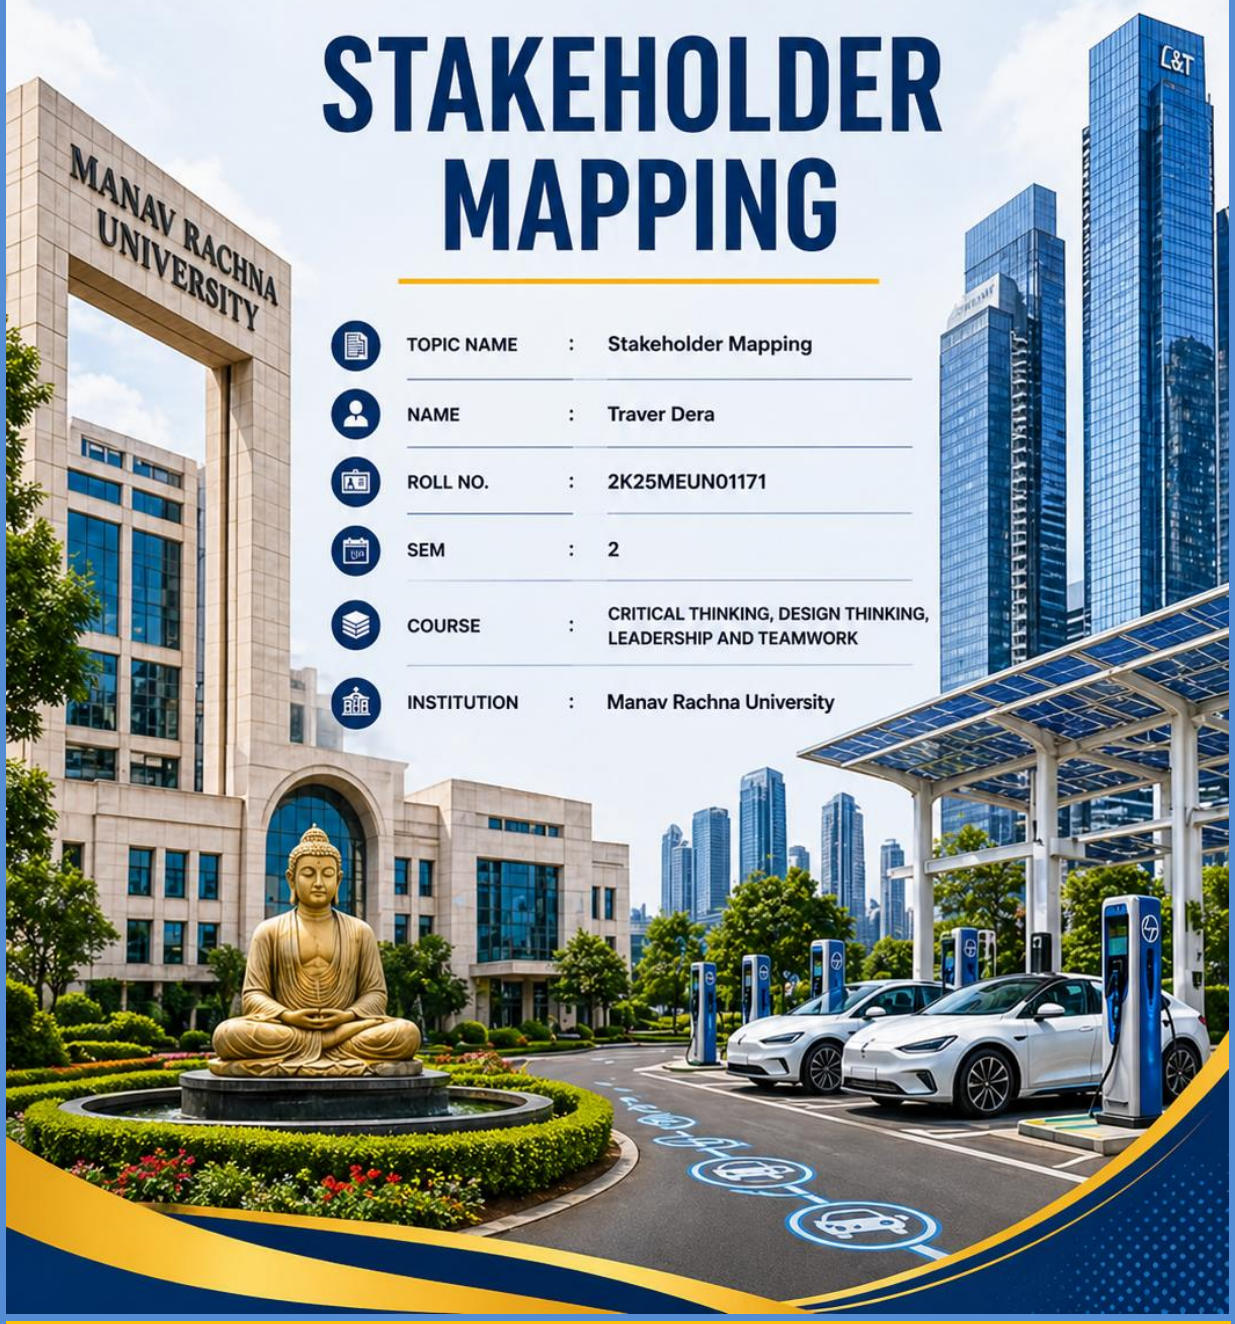
STAKEHOLDER MAPPING

TOPIC NAME	:	Stakeholder Mapping
NAME	:	Traver Dera
ROLL NO.	:	2K25MEUN01171
SEM	:	2
COURSE	:	CRITICAL THINKING, DESIGN THINKING, LEADERSHIP AND TEAMWORK
INSTITUTION	:	Manav Rachna University



1. Introduction

Stakeholder mapping is an important tool used in design thinking to identify and analyze individuals or groups who influence or are affected by a project. It helps in understanding stakeholder priorities and managing them effectively for successful project execution.

2K25MEUN01171

2. Objective

The objective of this activity is to categorize stakeholders based on their **power and interest levels**, and to develop appropriate strategies for engaging with them.

3. Selected Topic

Smart City with All Vehicles as E-Vehicles

4. Stakeholder Matrix (Power vs Interest)

The stakeholders were categorized into four groups:

Manage Closely (High Power – High Interest)

These stakeholders are the most important and must be actively engaged.

- Government Authorities
- Investors

Keep Satisfied (High Power – Low Interest)

These stakeholders have strong influence but less interest, so they should be kept satisfied.

- Electricity Providers
- Regulatory Bodies

Keep Informed (Low Power – High Interest)

These stakeholders are highly interested but have less influence.

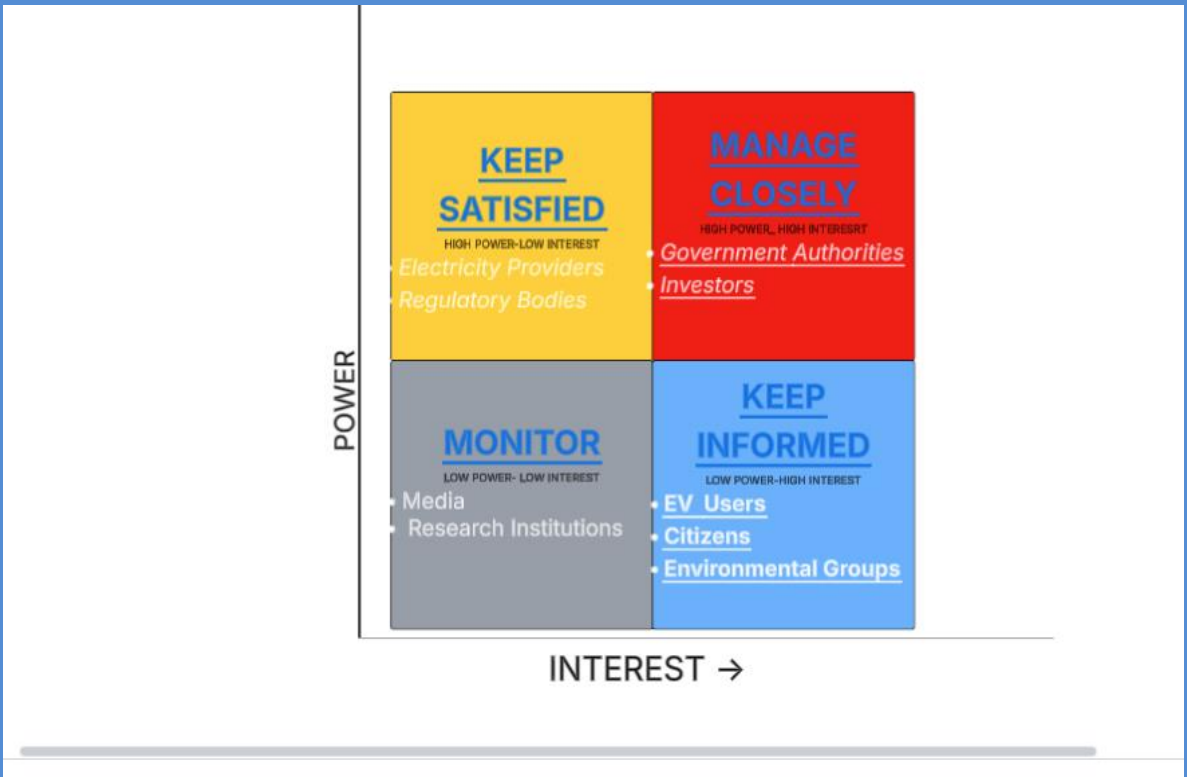
- EV Users
- Citizens
- Environmental Groups

Monitor (Low Power – Low Interest)

These stakeholders require minimal effort but should still be observed.

- Media
- Research Institutions

2K25MEUN01171



5. Stakeholder Analysis

The matrix shows that **government authorities and investors** are critical stakeholders due to their high power and interest.
Electricity providers and regulatory bodies must be kept satisfied to ensure smooth operations.
Citizens and environmental groups should be regularly informed as they are directly affected.
Media and research institutions require monitoring as their influence is limited but can grow over time.

6. Importance of Stakeholder Mapping

- Helps prioritize stakeholders effectively
- Improves communication strategies
- Supports better decision-making
- Reduces risks and conflicts
- Ensures smoother project implementation

2K25MEUI

7. Conclusion

Stakeholder mapping using the power-interest matrix provides a clear understanding of stakeholder roles and influence. In this project, it helped identify key stakeholders and define appropriate engagement strategies, ensuring effective planning and successful implementation of the smart EV city concept.
